

SMx[™] Specialty Matrix Products

In order to push the extremes of instrumental analysis and separation sciences, UTAK craft's Quality Controls for Clinical, Forensic, and Esoteric laboratories that are as close to human matrices possible. Originally, 100% REAL Human Matrices for Urine, Whole Blood and Serum, were utilized for most of our Quality Control product offerings.

Over time, and to keep up with our Customers requests for Custom and Specialty Products, we have developed line of Specialty Matrix Products or SMx[™] that originate with human components that may offer equivalent or better performance without many of the endogenous interferences.

UTAK, beyond measure...one test result at a time.

SMx[™] Serum

- Reduce Matrix Effects
- Increase Laboratory Efficiency

Open Architecture 3rd Party Control

- Increase Laboratory Flexibility
- Use on Any Testing Platform
